

NEERAJ SINGH

Quality Assurance Engineer • 📞 +91-9893359499 • ✉ singhneeraj195@gmail.com 📍 Gurugram, India

SUMMARY

Software Development Engineer in Test (SDET) with **6+ years of experience** in both manual and automation testing, test framework design, and CI/CD integration. Strong expertise in **Java, Selenium, Appium, REST Assured**, and **API testing**. Proven ability to design scalable automation frameworks for **web, mobile, and API applications**, lead QA teams, and improve delivery quality through continuous testing and automation in agile environment.

TECHNICAL SKILLS

- **Programming Languages** - Java
- **Test Automation Tools** - Selenium WebDriver, Appium
- **Test Frameworks & Methodologies**
 - TestNG, Cucumber (BDD)
 - Data-Driven, Hybrid Frameworks
- **API Testing** - Postman, REST Assured, Swagger UI
- **CI/CD Pipeline** - Jenkins, GitLab CI/CD
- **Build & Dependency Management** - Maven, Gradle
- **Version Control** - Git, GitHub, GitLab
- **Test Management & Tracking** - Jira, Click Up, Open Project
- **Databases** - MySQL, MongoDB, Neo4j
- **Cloud & Cross-Browser Testing** -
 - AWS, Microsoft Azure
 - Sauce Labs, Browser Stack

Automation Expertise:

- End-to-End UI Automation and Modern Framework Development
- API Automation & Validation
- Mobile App Automation (Android, iOS)
- CI/CD Pipeline Integration
- Report Validation & PDF Automation (OCR-based) and Content Comparison

PROFESSIONAL EXPERIENCE

eFleet Systems Pvt. Ltd., Gurugram (Onsite)

May 2025 – Present

Software Test Engineer (Deputy Manager QA)

- Led a **QA team of 6 engineers**, managing verification activities across all phases of **SDLC and STLC** for multiple projects.
- Improved team productivity by **~45%** through process optimization and automation adoption in agile environment.
- Designed and maintained automation frameworks for:
 - **Web:** Selenium + java
 - **Mobile:** Appium + java
- Integrated automated test suites into **GitLab CI/CD pipelines**, enabling continuous testing.
- Actively collaborated with developers and product teams to ensure timely defect resolution and quality releases.

Corefront Technologies Pvt. Ltd., Bangalore (Hybrid)

December 2019– May 2025

Software Test Engineer

- Led a **team of 5 QA engineers** for testing multiple national-level software products in agile environment.
- Delivered **manual and automation testing** across web, mobile, and API layers.
- Developed and maintained automation frameworks using:
 - **Web:** Selenium + Java
 - **Mobile:** Appium + Java
 - **API:** REST Assured
- Integrated automation execution with **Jenkins CI/CD**, collaborating closely with DevOps teams.
- Performed functional, regression, integration, and UAT testing to ensure stable releases in agile environment.

PROJECT EXPERIENCE**1. Quick Prism – E-Commerce Platform (Mobile & Web)****Role:** Project Lead – Manual & Automation Testing**Platforms:** Android, iOS, Web Application

- Led end-to-end testing activities for a full-scale e-commerce application supporting mobile and web platforms.
 - Designed and executed **manual test cases** covering product listing, search, cart, checkout, payment gateway, order tracking, and user profile modules.
 - Developed and maintained **automation test scripts** to ensure regression stability and faster release cycles.
 - Coordinated with developers, product owners, and stakeholders to clarify requirements and resolve defects.
 - Performed **functional, regression, integration, and UAT testing**, ensuring high product quality and user experience.
 - Mentored team members and ensured test execution aligned with delivery timelines.
-

2. Quick Prism – Visitor Log Management System**Role:** Project Lead – Manual & Automation Testing**Platforms:** Android, iOS, Web Application

- Led testing for a **visitor attendance and logging system** used across offices, schools, shopping malls, and government locations (zoos, monuments, public premises).
 - Validated visitor registration, check-in/check-out, pass generation, reporting, and admin control modules.
 - Implemented **automation coverage** for critical workflows to improve reliability and reduce manual effort.
 - Ensured system compliance with real-world usage scenarios and high-traffic environments.
 - Conducted **cross-platform testing** to ensure consistent behaviour across mobile and web applications.
 - Actively involved in requirement analysis, defect triaging, and release sign-off.
-

3. AU Small Finance Bank**Role:** QA Engineer**Domain:** Banking

- Performed functional and regression testing for banking applications with a focus on data accuracy and reliability.
 - Validated critical banking workflows, including transactions, customer data handling, and system validations.
 - Collaborated with cross-functional teams to identify and resolve defects within strict compliance standards.
 - Ensured adherence to banking domain quality and security requirements.
-

4. eMist 2.0 – Fleet & Logistics Management**Role:** Team Lead – Automation Testing**Platforms:** Web & Mobile Applications with National payment gateway system

- Led automation testing efforts for a fleet and logistics management solution related to transportation operations.
 - Designed scalable automation frameworks and optimized regression test suites.
 - Validated fleet operations, vehicle tracking, trip management, payment gate way and visa card payment gateway..
 - Managed task distribution, reviewed automation code, and guided team members on best practices.
 - Ensured smooth CI/CD test execution and high test coverage across releases.
-

5. eMist 2.0 – Workshop Management System**Role:** Team Lead – Automation Testing**Platforms:** Web & Mobile Applications with National payment gateway system

- Led automation testing for workshop operations including maintenance, service scheduling, inventory, and reporting.
 - Built robust automated test flows to validate end-to-end workshop processes.
 - Coordinated with development teams to ensure early defect detection and faster turnaround.
 - Improved test stability and reduced manual regression effort significantly.
-

6. eMist Pro – Fleet & Logistics Platform

Role: Team Lead – Automation Testing

Platforms: Web & Mobile Applications

- Led automation testing for a **next-generation fleet and logistics platform** using modern technologies.
 - Implemented advanced automation strategies to handle dynamic UI, role-based access, and complex workflows.
 - Ensured system performance, accuracy, and reliability for large-scale logistics operations.
 - Mentored team members and enforced automation and quality standards across the project.
-

7. eMist Pro – Workshop Management

Role: Team Lead – Automation Testing

Platforms: Web & Mobile Applications

- Led automation initiatives for workshop management modules in the eMist Pro ecosystem.
 - Validated service lifecycle, job cards, spare parts usage, and reporting features.
 - Strengthened automation framework maintainability and reusability.
 - Played a key role in release planning, quality sign-off, and continuous improvement initiatives.
-

KEY HIGHLIGHTS

- **Roles:** Project Lead | Team Lead | QA Engineer
- **Expertise:** Manual Testing, Automation Testing, Framework Design, Test Planning
- **Platforms:** Web, Android, iOS
- **Domains:** E-Commerce, Visitor Management, Banking, Fleet & Logistics, Workshop Management
